Profile

I am a frontend developer with backend knowledge. I build modern, fast, and user-friendly web and mobile apps. I mostly use Next.js, React, React Native, and TypeScript. I have worked on projects from design to development, deployment, and optimization.

I have experience with authentication, SSR/SSG, accessibility, and improving web performance. I also have basic knowledge about AI integrations.

On the backend, I have used Node.js, NestJS, and FastAPI. I have built and connected RESTful APIs and GraphQL services. I also use Docker, PostgreSQL, Supabase, WebSocket, and AWS to make my apps more secure and scalable.

I published a subscription-based mobile app on the App Store and Play Store. I enjoy solving problems, working in teams, and learning new things. I care about both the technical and human sides of software and am ready for new opportunities.

Skills: Web Development, Web Design, Front-End Development, Back-End Development, Mobile Design, Mobile Development, Real-Time Communication, DevOps, Database Management

Tools: HTML, CSS, Javascript, Python, React, Next.js, React Native, Git, Styled Components, Framer Motion, Tailwindcss, Bootstrap, Material UI, Shadcn, lottie, Redux, React Query, NodeJS, NestJS, Rest Api, Graphql, Typescript, Docker, Postman, Vite, Zustand, FastAPI, Supabase, Formik, Yup, WebSocket, Firebase, AWS, JWT Token, MongoDB, Sanity.io, RevenueCat

---

Projects

Bluesky (Open Source)

https://bsky.app/

Bluesky is an open-source social media project started by Jack Dorsey, the former CEO of Twitter. I contributed to this project by finding a text overflow problem on mobile devices caused by language translations. I suggested a solution and helped fix the issue by opening a GitHub issue.

Skills: Front-End Development, Mobile Design, Mobile Development

Tools: HTML, CSS, Nextjs, Git, Tailwind, Javascript, Typescript, SSR, SSG

Byte (Open Source)

https://github.com/emirtetik/byte

Byte is a powerful AI coding assistant extension for Visual Studio Code that helps improve your coding workflow with AI support. It provides a smooth chat interface and strong commands related to code to help you write, understand, reorganize, and optimize your code.

Skills: Front-End Development

Tools: HTML, CSS, Git, Javascript, Typescript, Restful Api

Tetrig

https://tetrig.com/

I developed a subscription-based application as a Full Stack developer and published it on both the App Store and Play Store, putting significant effort into every stage and personally managing the entire process. Through this, I gained valuable experience.

Skills: Web Development, Web Design, Front-End Development, Back-End Development, Mobile Design, Mobile Development, Database Management, Real-Time Communication

Tools: HTML, CSS, React Native, Git, Tailwind, Restful Api, Graphql, Javascript, Typescript, WebSocket, JWT Token, PostgreSQL, Nest.js, RTK Query

Taxigig

Taxigig is an innovative startup that I offered to a software company during its beta stage. We are developing it together by sharing some of the project rights.

Skills: Web Development, Web Design, Front-End Development, Back-End Development, Mobile Design, Mobile Development, Database Management, Real-Time Communication

Tools: HTML, CSS, React Native, Git, Tailwind, Restful Api, Javascript, Typescript, WebSocket, JWT Token, Google Maps, PostgreSQL, i18next, Push Notification, Tanstack Query, OneSignal, Nest.js, RTK Query

Bileton

https://bileton.vercel.app/

Bileton is a bootcamp project developed under my leadership. It is designed as a ticket sales website and includes Frontend, Backend, and an Admin Panel. Through this project, I learned the importance of efficient teamwork and guiding people in the right way.

Skills: Web Development, Web Design, Front-End Development, Back-End Development

Tools: HTML, CSS, React.js, Git, Tailwind, Rest Api, Javascript, Typescript, Node.js, Express.js

---

Experience

Voxnet Hosting - 2022

Volunteer Intern

At Voxnet Hosting, I gained knowledge about server operations, web architecture, deployment processes, and how a browser request is processed on the server. This helped me build a solid foundation, significantly contributing to my ability to develop products from scratch and making it easier for me to learn software development.

Education

Kocaeli University, Kocaeli, (2017/2023)

Techcareer Mid level Front-End Bootcamp, (2023/2024)

I improved my Frontend and Backend skills with technologies like JavaScript, React, and Node.js. In the final project, I took on the role of team leader.

Certificates

- **Beyond the Basics:** Mid-Level Front-End Bootcamp
- **Turkcell** | Geleceği yazanlar React 301
- **FreeCodeCamp** | FrontEnd Development Libraries
- **Patika Dev |** React Native
